The Moderator invited Mr. Sasavat Sirison, Chief Executive Officer, to report this agenda item to the Meeting. Mr. Sasavat Sirison reported the operating performance of the Company for the fiscal year ended December 31, 2024, to the Meeting, summarized as follows:

The Company had the total revenue for the year 2024 amounting to Baht 4,498.1 million, decreasing by Baht 1668.5 million or equivalent to 27.1 percent from the total revenue of the year 2023. The decrease in revenue was mainly from

1. Build Lease and Transfer Project of Hongsa, which was completed by the Company in the second quarter of the year 2024, resulting in a decrease in revenue recognition.
2. Mae Moh 8 Project, The excavation volume decreased from 45.1 million cubic meters to 41 million cubic meters, due to higher rainfall compared to the year 2023, and because the project was in its final phase, where the work volume decreased as per the contract.

The decrease in revenue resulted in a decrease in gross profit by Baht 285.3 million, to Baht 582.7 million, representing 32.9 percent compared to the same period in 2023. This led to a net loss of Baht 51 million, a decrease of Baht 181 million. Although the Company's expenses decreased in line with the revenue, the proportion of expense reduction was less than the revenue. Further details of the Company's significant expenses would be explained under Agenda Item 3 (Financial Statements).

The Company had an Interest Bearing Debt to Equity Ratio stand at 1.7 times. Despite partial repayment of the Project Finance, the Company still faced an increased liability, specifically from the bonds issued in 2024. As a result, the financial cost followed the upward trend in interest rates, increasing from 5.4 percent to 5.8 percent.

Operating Performance for Each Project

- **Hongsa Project** (Hongsa D and Hongsa O&M): The project generated revenue of Baht 1,538.8 million, a decrease of 7 percent compared to the year 2023. The main reason was the higher rainfall in 2023, which led the Company to adjust its operational plans. Additionally, the stability of electricity supply was affected, as the Hongsa power plant experienced certain operational issues during the period, resulting in reduced working volumes. However, the Company's service costs decreased by 16 percent, which led to an increase in gross profit for the Hongsa project by Baht 79.8 million.
- **North Pit Wall Project**: The project generated revenue of Baht 222 million from this project, representing a 7.3 percent decrease. The primary reason was the higher rainfall in 2023. Additionally, service costs increased by Baht 31 million, resulting in a loss of Baht 49.2 million for the project.
- **Mae Moh 8 Project**: The project generated revenue of Baht 2,178.8 million from this project, representing a 14.4 percent decrease. This decline was primarily due to the project entering its final phase. Coal excavation work was completed in early 2024 as per the contract, resulting in a reduction in work volume from the previous year's output to only 500,000 tons. Additionally, increased rainfall further impacted operations, leading to reduced revenue from the project. As a result, the gross profit from the Mae Moh project dropped significantly, leaving only Baht 1.5 million.
- **BLT (Build Lease and Transfer) Project**: The project was completed in the second quarter of the year 2023, resulting in a 68.9 percent decrease in revenue from the project, down to only Baht 515 million. The project costs remained unchanged, in line with the proportion of work delivered by the Company.

To conclude overall operating performance of the aforesaid 4 projects resulted in the Company recording a net loss in 2024.
